

DEPAUW UNIVERSITY

December 14, 2004

Gary E. Jackson, President
Waterfountains Inc.

Gary:

I am writing the following letter for you to use as a reference letter for others who may be considering using your company for the design and implementation of a water fountain.

Water Fountains has been a superb company to work with in achieving our goal at DePauw University, Greencastle, Indiana, of designing and implementing an indoor fountain to be placed within an atrium in our Julian Science Building. Our fountain is aesthetically beautiful and is appropriate for the specified space. The colors and design for base and sphere blend with the floor and the atrium. We found Water Fountains to be eager to meet our needs, from planning stage to the finished product. Gary has worked ardently with our university technician to make adjustments to the water flow of the fountain; and the fountain is working well for us. We found the company to be conscientious in meeting production and shipment goals and to be helpful in designing an artistic product that matched our monetary budget. I highly recommend Waterfountains.

Sincerely,

Professor Judith George
Project Implementor, James George Memorial Fountain
