Re: Belmar Block 6 Plaza
J. E. Dunn Project No. 8856
Waterfountains.com

To Whom it May Concern:

J. E. Dunn Construction Company contracted with Waterfountains.com for the fabrication of a 6 foot diameter granite ball, base and mechanical equipment for a new development project in Lakewood Colorado. This was the first time in our company history that we installed something like this and Gary was there every step of the way. He provided updates with pictures as the ball was being fabricated as well as provide a new base at no additional cost when the granite requested by the owner failed during testing. In addition Gary was on site when we installed the base and ball to help assist us with the installation. The owner contacted several TV channels to video the setting of the ball, which added to the pressure, but the installation came off without a hitch. The ball has been working now for over a month without any problems. I would certainly use Waterfountains.com again and not hesitate in recommending them for other projects.

Sincerely,

J. E. DUNN CONSTRUCTION COMPANY

Brian Holthaus
Senior Project Manager
