Dear Gary,

It was a pleasure working with you and getting our "globestone", as we are calling it, ordered, purchased and installed. It really sets off the entrance to Discovery Peak in our World of Wonders: A Children's Adventure Garden. As anticipated, it has been very popular with adults as well as children.

I will recommend you without reservation to any other gardens, museums, etc. who may be contemplating acquiring a floating sphere. Thanks for all your help in making the process of acquiring a wonderful garden addition so easy.

Don Buma
Norfolk Botanical Garden
