Mr. Gary E. Jackson

I would like to commend you and your company on the excellent work you have done in creating our custom sculpture that we have named the Floating Granite Globe. The details and the layout of our Earth are excellent.

We have placed the sculpture as an iconic piece near our main entrance and it never fails to enthrall our visitors. The sculpture also acts as an introduction to our earth sciences and mining center.

I would recommend your products to any business or institution.

Thank you, again for your quality service and great product.

Dan Chaput
